

Mechanical Engineering student at Queen's University with production optimization experience in upstream oil and gas, supporting well diagnostics, workover planning, and field operations. Seeking an EIT role where strong analytical, technical, and operational skills can contribute to safe and efficient energy production.

Work Experience

Field Optimization Engineering Intern

Whitecap Resources Inc. • May 2025 - August 2026

- Evaluated production performance across 800+ producing wells, identifying optimization opportunities to support production growth and operational efficiency.
- Developed diagnosis and repair programs for 400+ workovers, supporting over \$16M in operating expenses.
- Identified and prioritized well intervention opportunities through production data analysis, supporting field execution and operational decision-making.

Summer Student

SaskEnergy Inc. • Summers 2023-2024

- Performed field maintenance on equipment and sites in rural communities, ensuring safety and compliance.
- Supported technicians in troubleshooting and daily operations, gaining hands-on exposure to utility systems.

Concession Attendant

Dunnet Regional Park • Summers 2019-2022

- Delivered customer service and supported operations in a high-volume seasonal environment.

Education

Queen's University- Smith Engineering

Bachelor of Applied Science, Mechanical & Materials Engineering, April 2027 Dean's List 2024-2025

Queen's University- Smith School of Business

Certificate in Business, April 2026

Skills & Abilities

- Programming: Python, SQL, MATLAB, C/C++
- CAD: SolidWorks, Autodesk Fusion
- Data & Analytics: Excel (VBA, Power Query), PowerBI, Tableau
- Technical Skills: Technical Reporting, Data Analysis, Communication

Certifications & Training

- Standard First-Aid and CPR I H2S Alive I WHMIS I TDG
- AI Pathways: Energizing Canada's Low-Carbon Workforce, Foundations and Technical Tracks -Amii
- Courses in Reservoir & Completions Engineering Fundamentals - SAGA Wisdom

Extra-Curricular

Co-Founder, Co-Chair

Undergraduate First-Aid Initiative at Queen's • August 2024 - May 2025, May 2026 - Present

- Co-founded a student-led initiative providing subsidized First-Aid and CPR certification to Queen's students.
- Led ratification, executive recruitment, fundraising and program launch planning.
- Coordinated instructors, budgeting, marketing, and student outreach for campus certification clinics.

Interior Subteam Member

Queen's Relectric Design Team • September 2023 - April 2025

- Contributed to the conversion of a gas-powered Jeep Wrangler into a fully electric vehicle.
- Collaborated with a multi-disciplinary team to model a custom dashboard, as well as wire, program and integrate a digital display.

Volunteer Experience

Volunteer - Fix 'N' Clean

Engineering Society of Queen's University • Spring and Fall, 2022-2025

- Provided yard work and household chores for elderly and physically limited community members, collaborating with student volunteers to deliver practical support, strengthening teamwork and communication skills.
